

# 2 Cut chisel from Two Cherries

New this month is the first universal tool from Two Cherries with two edges: front and side. Now you're able to tackle multiple work with just one tool; cutting, scraping, peeling, notching, slitting and marking. With professional and semi-professional woodworkers in mind the 2 Cut is produced to the same exacting standards expected from Two Cherries. At 26mm wide and 90mm long the cutting edges are ground and highly polished over the entire length of the blade which is case hardened in a salt bath up to 60 + / - 1 HRc. The back edge can be used with a wooden or plastic mallet. Made in Germany this tool is sold with a belt holster for joiners, carpenters, cabinet-makers, roofers, carvers and many more besides.
